Wakefield Acoustics
Industrial Noise Control Solutions

3D Solidworks Draughtsperson/Contracts Engineer

Based in Cleckheaton Wakefield Acoustics is a leading manufacturer of industrial noise control equipment to a wide variety of blue chip customers within the oil and gas, power generation, water industry and general manufacturing sectors worldwide.

The company designs, manufactures and installs a range of bespoke equipment such as acoustic enclosures, silencers, acoustic doors, panels and louvres.

As part of its growth programme the company is expanding its utilization of its 3D capability and seeking to recruit a 3D Draughtsperson/Contracts Engineer with practical working experience of Solidworks in an engineering environment.

The core responsibilities of the role include:

- Generation of GA and detail manufacturing drawings, specifications, bills of materials, parts lists etc to in-house manufacturing teams and external suppliers.
- Updating, modifying and completing CAD models & production drawings to meet quality standards both during & after manufacture.
- Close liaison with contracts engineers and manufacturing teams, customers and suppliers
- Site surveys in support of above activities
- Design & development of products and customer orders utilizing 3D CAD

The ideal candidate will :

- Be qualified to minimum HNC level
- Have practical experience of utilising Solidworks in an engineering, ideally sheet metal,l environment
- Have the ability to produce high quality accurate engineering drawings in support of the company's activities.
- Experienced and confident in 2D Autocad and Solidworks packages
- Be self motivated, able to work to tight deadlines and under own initiative and possess good communication skills.

Experience within sheet metal/fabrication business would be advantageous.

Along with a highly competitive base salary (negotiable on experience), the successful candidate can expect to become a key member of a successful and growing business with a strong commitment personal training and development.
